

SURVEYING TRENDS IN TECHNOLOGY PREFERENCE AMONGST DEVELOPERS

CHRISTOPHER A. EREFOROKUMA
January 2023

OUTLINE

- **Executive Summary**
- **Introduction**
- **Methodology**
- **Results**
 - **Visualization – Charts**
 - **Dashboard**
- **Discussion**
 - **Findings & Implications**
- **Conclusion**
- **Appendix**

EXECUTIVE SUMMARY

- **Current Technology Usage**

- Top ten languages.
- Top ten Databases.
- Platforms
- Top ten Webframes.

- **Future Technology Usage**

- Top ten languages desired for the coming year.
- Top ten Databases desired for the coming year.
- Platforms desired for the coming year.
- Top ten Webframes desired for the coming year.

- **Demographics**

- Respondents classified by Gender.
- Respondent count for Countries.
- Respondent Count by Age.
- Respondent Count by Gender, classified by Formal Education Level.

INTRODUCTION

- **This Presentation is made to be shared with global investors, employers and developers within the technology market and beyond.**
- **Here we have identified past and future trends in preference and requirements as it concerns Programming Languages, Dataframes, Webframes and Platforms.**
- **The implications of these findings will be included in this presentation.**

METHODOLOGY

- **Data used for this analysis was sourced from a subset of “Stack Overflow Developer Survey Results”.**
- **The data was then used to visualize, within the IBM COGNOS Dashboard environment, the relationship between key features of the dataset.**

RESULTS

Results are based on this dataset:

	Respondent	LanguageWorkedWith	LanguageDesireNextYear	DatabaseWorkedWith	DatabaseDesireNextYear	PlatformWorkedWith
0	4	C	C	MySQL	MySQL	Linux
1	4	C++	C#	SQLite	SQLite	Windows
2	4	C#	JavaScript	NaN	NaN	NaN
3	4	Python	SQL	NaN	NaN	NaN
4	4	SQL	NaN	NaN	NaN	NaN
...
74584	25142	Go	Python	NaN	NaN	NaN
74585	25142	HTML/CSS	R	NaN	NaN	NaN
74586	25142	PHP	NaN	NaN	NaN	NaN
74587	25142	Python	NaN	NaN	NaN	NaN
74588	25142	R	NaN	NaN	NaN	NaN

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 5 programming languages for current year

Next Year

Top 5 programming languages Next Year

PROGRAMMING LANGUAGE TRENDS – FINDINGS & IMPLICATIONS

Findings

- **Keeping with the trend from this year, JavaScript and HTML/CSS remain the most desirable programming languages.**
- **For next year, there is a projected increase in interest for Python and an introduction of TypeScript into the top 5.**
- **Interest in Bash/Shell/PowerShell is projected to drop for the coming year.**

Implications

- **Interest in and preference for python by programmers will have a positive impact in the growing demand for Artificial Intelligence and Machine Learning.**
- **SQL seems to remain the choice of programmers when it comes to Big Data Technology.**
- **With JavaScript and HTML/CSS topping the preference list, just implies that Web Development is still very much in high demand.**

DATABASE TRENDS

Current Year

Top 10 Databases for Current year

Next Year

Top 10 Databases for Next year

DATABASE TRENDS – FINDINGS & IMPLICATIONS

Findings

- **PostgreSQL , MongoDB and Redis have increased desirability for next year.**
- **MySQL and Microsoft SQL server have reduced desirability for next year.**

Implications

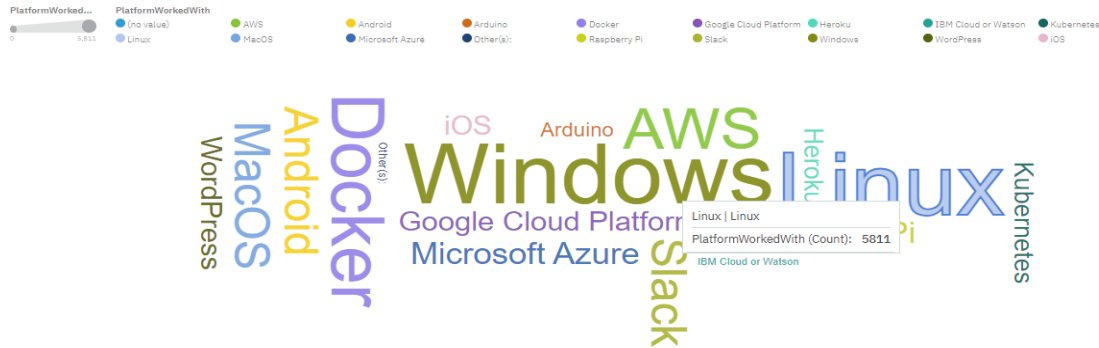

- **NoSQL databases will make huge impact in the coming year.**
- **Data trends point towards the preference of Open-source databases.**

DASHBOARD

DISCUSSION

- **Technology Trends pointing towards a future leaning heavily towards Big Data and machine learning.**
- **Bridging the gap in technology in Developing Countries and between Genders.**
- **Future Training and reskilling of programmers to fit current and future demands**

OVERALL FINDINGS & IMPLICATIONS

Findings

- **The current and future is trending in favor of high-level languages such as JavaScript, HTML and Python.**
- **Non-relational databases are on the rise as far preference by programmers is concerned.**
- **There is huge gap between Genders in the tech industry**
- **Third world countries are grossly under-represented in the tech industry.**

Implications

- **Easy to learn, advanced languages are the most in-demand.**
- **The rising preference for non-relational databases pointing towards continuous rise in Big Data, Machine Learning and Artificial Intelligence.**
- **Technology must be spread to Regions and Genders that are underrepresented.**

CONCLUSION

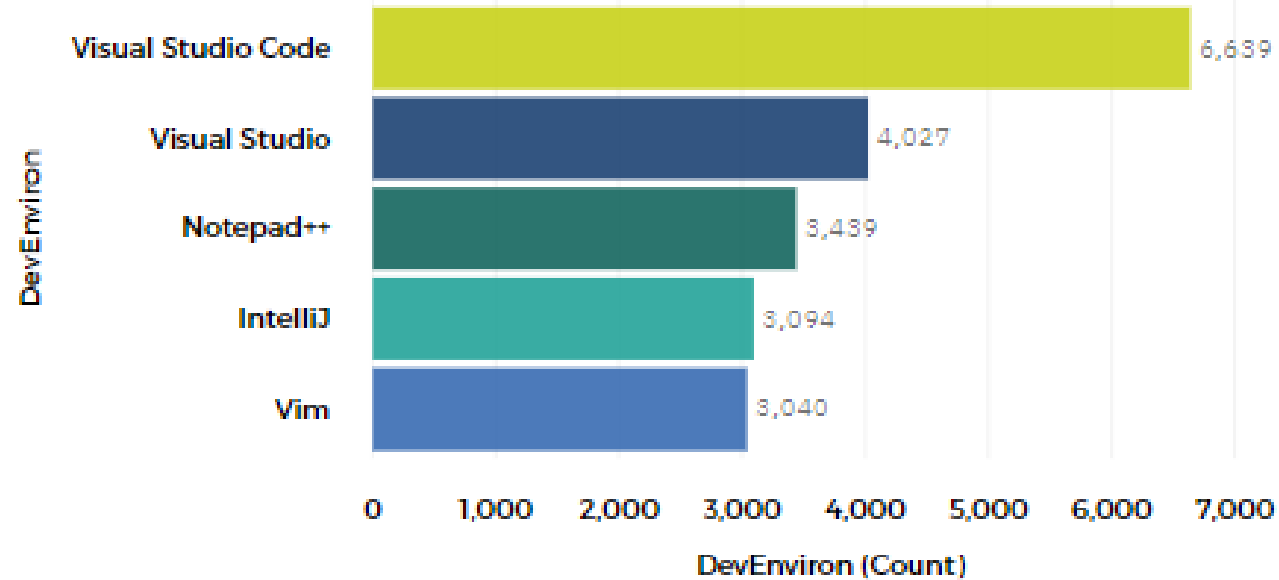

- **Technology Trends for current and next year**
- **Programming Languages, Database and Platform overview**
- **Demographics overview**
- **Actions to be taken**
